Conversely, mRNA and protein expression suppressed by lipid efflux. Induction is mediated by the liver X receptor/retinoide X receptor (LXK/RXR) pathway.

-I- FUNCTION: MAY BE PART OF A MEMBRANE-SPANNING PERMEASE SYSTEM NECESSARY FOR THE TRANSPORT OF PIGMENT PRECURSORS INTO PIGMENT CELLS RESPONSIBLE FOR EYE COLOR.

-I- SUBCELLULAR LOCATION: Integral membrane protein.
-I- SIMILARITY: BELONGS TO THE ABC TRANSPORTER FAMILY. MDR SUBFAMILY.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The present invention relates to a new mammalian ATP-binding cassette CC gene 5 (ABCG5) polypeptide. The invention is useful for identifying a CC predisposition for developing sitosterolemia, arteriosclerosis or heart CC disease. The molecules of the invention are also useful for identifying CC a compound which alters ABCG5 activity level comprising contacting a cell CC culture or mammal which have ABCG5 polypeptide with a compound and CC measuring ABCG5 biological activity in the cell culture or in mammal. CC where an increase or decrease in ABCG5 biological activity in a control cell culture or mammal not CC contacted with the compound, identifies a compound that increases or CC decreases ABCG5 activity respectively. The cell culture or mammal CC comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The CC ABCG5 biological activity, or level of ABCG5 mRNA, or level of the CC elimilation of ABCG5 activity is useful for treating or preventing CC stimulation of ABCG5 activity is useful for treating or preventing CC disease. The method of the invention is useful for increasing cholesterol active or mammal abCG5 polypeptide. The method of the invention is useful for the invention. This sequence is encoded by the human ABCG5 protein of the invention. This

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             δÃ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             HOMO SUPPLIES WOOZOO179272-A2.
                                                                                                                                                                                                          (SSG) polypeptide. SSG is a member of adenosine triphosphate (ATP) binding cassette (ABC) family cholesterol transporter. SSG is useful for identifying a compound useful in the treatment or prevention of a sterol-related disorder, including sitosterolaemia, hyperlipidaemia, hypercholesterolaemia, gall stones, HDL deficiency, atherosclerosis or nutritional deficiencies. SSG is also useful for treating cholesterol-associated diseases or conditions including coronary heart disease and other cardiovascular diseases, and sitosteroleemia-associated condition including arthritis, xanthomas and chronic haemolytic anaemia. SSG expression cassette is useful in the production of transgenic non-human animals. SSG genes and their homologues are useful as tools for a number
                                                                        of applications including diagnosing sitosterolaemia and other cardiovascular disorders, for forensics and paternity determinations, and for treating any of a large number of SSG associated diseases. The present sequence is human SSG protein. Human SSG is located on chromo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Novel sitosterolemia susceptibility gene polypeptide and polynucleotide, useful for screening a compound that increases the level of expression or activity of SSG polypeptide for treating
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The invention relates to an isolated Sitosterolaemia Susceptibility
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Claim 19; Fig

```
a compound which alters ABGGS activity level comprising contacting a cell culture or mammal which have ABGGS polypeptide with a compound and measuring ABGGS biological activity in the cell culture or in mammal, where an increase or decrease in ABGGS biological activity compared to ABGGS biological activity in a control cell culture or mammal not contacted with the compound, identifies a compound that increases or decreases ABGGS activity respectively. The cell culture or mammal comprises a mutated ABGGS polypeptide or a wild type polypeptide. The ABGGS biological activity, or level of ABGGS mRNA, or level of the polypeptide in a cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal comprising a wild type ABCGS polypeptide. Stimulation of ABCGS activity is useful for treating or preventing the presenting contacterol activity is contacted activity in the cell culture or mammal comprising cholesterol activity is seful for increasing cholesterol activity is contacted activity in the cell culture or mammal is also activity contacted activity in the cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal comprision is compared with that of a second cell culture or mam

The present invention relates to a new mammalian ATP-binding cassette gene 5 (ABCG5) polypeptide. The invention is useful for identifying a predisposition for developing sitosterolemia, arteriosclerosis or heart disease. The molecules of the invention are also useful for identifying a compound which alters ABCG5 activity level comprising contacting a cell culture or mammal which have ABCG5 polypeptide with a compound and measuring ABCG5 biological activity in the cell culture or in mammal, where an increase or decrease in ABCG5 biological activity compared to ABCG5 biological activity in a control cell culture or mammal not contacted with the compound, identifies a compound that increases or decreases ABCG5 activity respectively. The cell culture or mammal
                                                                                                                                                                                                    Novel mammalian ATP-binding cassette gene 5 polypeptide, and the nucleic acid encoding the polypeptide, useful for treating sitosterolemia, arteriosclerosis and heart diseases

The ABCG5 biological activity, or level of ABCG5 mRNA, or level of the polypeptide in a cell culture or mammal is also compared with that of a second cell culture or mammal comprising a wild type ABCG5 polypeptide. Stimulation of ABCG5 activity is useful for treating or preventing hypersterolemia, arteriosclerosis, heart disease and/or Alzhelmer's disease. The method of the invention is useful for increasing cholesterol excretion and/or decreasing cholesterol adsorption. The present amino acid sequence represents the human ABCG5 mutant R419H protein of the

                                                                                                                                                                                                                                                                                                                                                                                                  decreases ABCG5 activity respectively. The cell culture or manual comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The ABCG5 biological activity, or level of ABCG5 mRNA, or level of the polypeptide in a cell culture or mammal is also compared with that of a second cell culture or mammal comprising a wild type ABCG5 polypeptide. Stimulation of ABCG5 activity is useful for treating or preventing hypersterolemia, arteriosclerosis, heart disease and/or Alzheimer's disease. The method of the invention is useful for increasing cholesterol excretion and/or decreasing cholesterol adsorption. The present amino acid sequence represents the human ABCG5 mutant R389H protein of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     where an increase or decrease in ABCG5 biological activity compared ABCG5 biological activity in a control cell culture or mammal not contacted with the compound, identifies a compound that increases or contacted with the compound.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The present invention relates to a new mammalian ATP-binding cassette gene 5 (ABCG5) polypeptide. The invention is useful for identifying a predisposition for developing sitosterolemia, arteriosclerosis or heart disease. The molecules of the invention are also useful for identifying a compound which alters ABCG5 activity level comprising contacting a cell culture or mammal which have ABCG5 polypeptide with a compound and
                                                                                                                                                                                                                                                                                Sequence
                                                                                                                                                                                                                                                                                                                                   Note: This sequence is not shown in the specification but is derived from the wild type human ABCG5 protein (AAU96984) given on pages 35-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Claim 7; Page -; 66pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Novel mammalian ATP-binding cassette gene 5 polypeptide, an nucleic acid encoding the polypeptide, useful for treating sitosterolemia, arteriosclerosis and heart diseases
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               measuring ABCG5 biological activity in the cell culture or in mammal, where an increase or decrease in ABCG5 biological activity compared to ABCG5 biological activity in a control cell culture or mammal not
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Patel SB, Dean M;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present invention relates to a new mammalian ATP-binding cassette CC gene 5 (ABCG5) polypeptide. The invention is useful for identifying a CC predisposition for developing sitosterolemia, arteriosclerosis or heart CC disease. The molecules of the invention are also useful for identifying a cCC culture or mammal which have ABCG5 polypeptide with a compound and CC measuring ABCG5 biological activity in the cell culture or in mammal, which have ABCG5 polypeptide with a compound and CC where an increase or decrease in ABCG5 biological activity compared to CC ABCG5 biological activity in a control cell culture or mammal not CC contacted with the compound, identifies a compound that increases or decreases ABCG5 activity respectively. The cell culture or mammal CC Comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The CC ABCG5 biological activity, or level of ABCG5 mid type polypeptide. The CC ABCG5 biological activity, or level of ABCG5 mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a second cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a compound cell culture or mammal is also compared with that of a compound cell culture or mammal i

                    (SSG) polypeptide. SSG is a member of adenosine triphosphate (APP) CC binding cassette (ABC) family cholesterol transporter. SSG is useful CC for identifying a compound useful in the treatment or prevention of a Sterol-related disorder, including sitosterolaemia, hyperlipidaemia, hyperricholesterolaemia, gall stones, HDL deficiency, atherosclerosis or cutritional deficiencies. SSG is also useful for treating cholesterol-cc associated diseases or conditions including coronary heart disease and cother cardiovascular diseases, and sitosterolaemia-associated condition including archritis, xanthomas and chronic haemolytic anaemia. SSG expression cassette is useful in the production of transgenic non-human complete the conditions including diagnosing sitosterolaemia and other cardiovascular disorders, for forensics and paternity determinations, candinals. SSG genes and their homologues are useful as tools for a number cardiovascular disorders, for forensics and paternity determinations, candiovascular disorders, for forensics and paternity determinations, and cortest sequence is mouse SSG protein variant obtained by replacing the present sequence is mouse SSG protein variant obtained by replacing
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Mus sp.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ğ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CC The invention relates to an isolated Sitosterolaemia Susceptibility Gene CC (SGS) polypeptide. SSG is a member of adenosine triphosphate (ATP) CC binding cassette (ABC) family cholesterol transporter. SSG is useful CC for identifying a compound useful in the treatment or prevention of a CC sterol-related disorder, including sitosterolaemia, hyperlipidaemia, CC hypercholesterolaemia, gall stones, HD deficiency, atherosclerosis or CC nutritional deficiencies. SSG is also useful for treating cholesterol-CC associated diseases or conditions including coronary heart disease and CC other cardiovascular diseases, and sitosterolaemia-associated condition CC conditions and chronic haemolytic anaemia. SSG CC expression cassette is useful in the production of transgenic non-human, CC animals. SSG genes and their homologues are useful as tools for a number CC cardiovascular disorders, for forensics and paternity determinations, CC and for treating any of a large number of SSG associated diseases. The CC chromosome 17.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Ş
               The invention relates to an isolated Sitosterolaemia Susceptibility Gene (SSG) polypeptide. SSG is a member of adenosine triphosphate (ATP) binding cassette (ABC) family cholesterol transporter. SSG is useful for identifying a compound useful in the treatment or prevention of a sterol-related disorder, including sitosterolaemia, hyperlipidaemia, hypercholesterolaemia, gall stones, HDL deficiency, atherosclerosis or nutritional deficiencies. SSG is also useful for treating cholesterolaesosciated diseases or conditions including coronary heart disease and other cardiovascular diseases, and sitosterolaemia-associated condition including arthritis, xanthomas and chronic haemolytic anaemia. SSG expression cassette is useful in the production of transgenic non-human expression cassette is useful in the production of transgenic non-human
                                                                                                                                                                                                                                                                                                                                                                                                                                         Novel sitosterolemia susceptibility gene polypeptide and polypurclectide, useful for screening a compound that increases the level of expression or activity of SSG polypeptide for treating sterol-related disorder
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Mouse; sitosterolaemia susceptibility gene; SSG; atherosclerosis; mutein; sterol-related disorder; hyperlipidaemia; hypercholesterolaemia; mutant; gall stone; coronary heart disease; cardiovascular disease; arthritis; xanthoma; haemolytic anaemia; transgenic animal; therapy; variant.

                                                                                                                                                                                                                                                                                                                                             The present invention relates to a new mammalian ATP-binding cassette CC gene 5 (ABCG5) polypeptide. The invention is useful for identifying a CC predisposition for developing sitosterolemia, arteriosclerosis or heart CC disease. The molecules of the invention are also useful for identifying a compound which alters ABCG5 activity level comprising contacting a cell CC unture or mammal which have ABCG5 polypeptide with a compound and CC measuring ABCG5 biological activity in the cell culture or in mammal, CC where an increase or decrease in ABCG5 biological activity on a control cell culture or mammal not CC contacted with the compound, identifies a compound that increases or CC decreases ABCG5 activity respectively. The cell culture or mammal CC comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The CC ABCG5 biological activity, or level of ABCG5 mammal is also compared with that of a second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is useful for treating or preventing CC disease. The method of the invention is useful for increasing cholesterol excretion and/or decreasing cholesterol adsorption. The present amino CC acid sequence represents the mouse ABCG5 protein of the invention.

Novel mammalian ATP-binding cassette gene 5 puncleic acid encoding the polypeptide, useful sitosterolemia, arteriosclerosis and heart di heart diseases polypeptide, ul for treati treating

Example Ψ Page 45; 66pp; English.

The present invention relates to a new mammalian ATP-binding cassette gene 5 (ABCG5) polypeptide. The invention is useful for identifying a predisposition for developing sitosterolemia, arteriosclerosis or hear disease. The molecules of the invention are also useful for identifyin a compound which alters ABCG5 activity level comprising contacting a culture or mammal which have ABCG5 polypeptide with a compound and measuring ABCG5 biological activity 'n lerosis or heart for identifying contacting a cell 얁

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       where an increase or decrease in ABCG5 biological activity compared to ABCG5 biological activity in a control cell culture or mammal not contacted with the compound, identifies a compound that increases or decreases ABCG5 activity respectively. The cell culture or mammal comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The ABCG5 biological activity, or level of ABCG5 mRNA, or level of the polypeptide in a cell culture or mammal is also compared with that of a second cell culture or mammal comprising a wild type ABCG5 polypeptide. Stimulation of ABCG5 activity is useful for treating or preventing hypersterolemia, arteriosclerosis, heart disease and/or Alzheimer's disease. The method of the invention is useful for increasing cholesterol excretion and/or decreasing cholesterol adsorption. The present amino acid sequence represents the rat ABCG5 protein of the invention.

The present invention relates to a new mammalian ATP-binding cassette CC gene 5 (ABCG5) polypeptide. The invention is useful for identifying a CC predisposition for developing sitosterolemia, arteriosclerosis or heart CC disease. The molecules of the invention are also useful for, identifying CC a compound which alters ABCG5 activity level comprising contacting a cell CC culture or mammal which have ABCG5 polypeptide with a compound and CC measuring ABCG5 biological activity in the cell culture or in mammal. CC where an increase or decrease in ABCG5 biological activity compared to CC ABCG5 biological activity in a control cell culture or in mammal not CC contacted with the compound, identifies a compound that increases or CC decreases ABCG5 activity respectively. The cell culture or mammal CC comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The CC ABCG5 biological activity, or level of ABCG5 mRNA, or level of the CC ABCG5 biological activity, or level of ABCG5 mRNA, or level of the CC ABCG5 biological activity is useful for treating or preventing CC second cell culture or mammal comprising a wild type ABCG5 polypeptide. The CC Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell culture or mammal is also compared with that of a Second cell cult
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Novel mammalian ATP-binding cassette gene 5 polypeptide, and nucleic acid encoding the polypeptide, useful for treating sitosterolemia, arteriosclerosis and heart diseases
                                                                     Note: This sequence is not shown in the specification but is derived from the wild type human ABCG5 protein (AAU96984) given on pages 35-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Claim 10; Page -; 66pp; English.

       The present invention relates to a new mammalian ATP-binding cassette gene 5 (ABCG5) polypeptide. The invention is useful for identifying a predisposition for developing sitosterolemia, arteriosclerosis or heart disease. The molecules of the invention are also useful for identifying a compound which alters ABCG5 activity level comprising contacting a cell culture or mammal which have ABCG5 polypeptide with a compound and measuring ABCG5 biological activity in the cell culture or in mammal, where an increase or decrease in ABCG5 biological activity in a control cell culture or mammal not contacted with the compound, identifies a compound that increases or decreases ABCG5 activity respectively. The cell culture or mammal comprises a mutated ABCG5 polypeptide or a wild type polypeptide. The
                                                                                                                                                  Novel mammalian ATP-binding cassette gene 5 polypeptide, nucleic acid encoding the polypeptide, useful for treatisitosterolemia, arteriosclerosis and heart diseases

polypeptide in a cell culture or mammal is also compared with that of a second cell culture or mammal comprising a wild type ABCG5 polypeptide. Stimulation of ABCG5 activity is useful for treating or preventing hypersterolemia, arteriosclerosis, heart disease and/or Alzheimer's disease. The method of the invention is useful for increasing cholesterol excretion and/or decreasing cholesterol adsorption. The present amino
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               sequence represents the hamster ABCG5 protein of the invention

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                CC a compound which alters ABCGS activity level comprising contacting a cell CC culture or mammal which have ABCGS to polypeptide with a compound and CC measuring ABCGS biological activity in the cell culture or in mammal, CC where an increase or decrease in ABCGS biological activity compared to CC contacted with the compound, identifies a compound that increases or CC contacted with the compound, identifies a compound that increases or CC decreases ABCGS activity respectively. The cell culture or mammal not CC comprises a mutated ABCGS polypeptide or a wild type polypeptide. The CC ABCGS biological activity, or level of ABCGS minulation of ABCGS activity is useful for treating or preventing CC second cell culture or mammal is also compared with that of a CS stimulation of ABCGS activity is useful for treating or preventing CC disease. The method of the invention is useful for increasing cholesterol acid sequence represents the human ABCGS mutant R243X protein of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Query Match

CC AAC74446 to AAC77606 encode the proteins given in AAB40237 to AAB43397, CC which represent the human ORFX open reading frames 1 to 3161. The ORFX CC sequences have activities such as: cytostatic, hepatotropic; vulnerary; CC antipsoriatic; antiparkinsonian; nootropic; neuroprotective; costeopathic; anticonvulsant; antiarthritic; immunosuppressant; CC immunostinulant; cardiant; thrombolytic; coagulant; vasotropic; coantidiabetic; hypotensive; dermatological; immunosuppressive; coantiinflammatory; antibacterial; antiviral; antifungal; antirheumatic; CC antiinflammatory; antibacterial; antiviral; antifungal; antirheumatic; coatilityroid; and antianaemic. The sequences can be used for determining CC the presence of or predisposition to, or preventing or treating CC ucleic acids can be used to express ORFX proteins in gene therapy CC vectors. The proteins and nucleic acids may be used to treat cancers, CC ucleic acids can be used to express ORFX proteins in gene therapy CC vectors. The proteins and nucleic acids may be used to treat cancers, CC graft vs host disease, cardiovascular disease, diabetes mellitus, CC hypertension, hypothyroidism, cholesterol ester storage, systemic lupus CC erythematosus, severe combined immunodeficiency (SCID), AIDS, viral, CC allerative disastic anaemia. burns. wounds. bone and cartilace damage.

DISEASE: Defects in ABCG5 are a cause of sitosterolemia, also known as phytosterolemia or shellfish sterolemia, a rare autosomal recessive disorder characterized by increased intestinal absorption of all sterols including cholesterol, plant and shellfish sterols, and decreased bilary excretion of dietary sterols into bile. Sitosterolemia patients have hypercholesterolemia, very high levels of plant sterols in the plasma, and frequently develop tendon and tuberous xanthomas, accelerated atherosclerosis and premature coronary artery disease.
